

# pinnacle. Video Transfer

## Just Press & Go

### Product Overview

Pinnacle Video Transfer is a compact, easy-to-use USB 2.0 device that lets you copy a video source to any USB 2.0 mass storage device, such as a video iPod®, PSP®, USB 2.0 flash drive or USB 2.0 hard drive.

You don't need a PC to use Pinnacle Video Transfer. It transfers video directly from the source to the storage device.

### With the press of a button Pinnacle Video Transfer lets you:

- Record TV shows and movies to your Apple® iPod® or Sony™ PSP®
- Digitize home movies to a USB 2.0 hard drive for safe keeping
- Back up vacation videos on a portable USB 2.0 storage device
- Directly record gaming sessions from your favorite console to a mobile device

Pinnacle Video Transfer is the easy way to copy video to a USB 2.0 mass storage device – no PC required.

### Key Features

- **PC-less capture** of your video to an iPod, PSP, USB 2.0 hard drive or USB Flash Stick.
- **One-touch start/stop recording** from any video source including a TV, DVD player, PVR, camcorder, set-top box or gaming console.
- **High-quality MPEG-4 encoding** in H.264 at up to 720x480/576 (NTSC/PAL) resolution\*.
- **Multiple capture options** for mobile devices, full-screen PC and even video editing or DVD burning.\*
- **S-Video, composite video and stereo audio** analogue inputs.
- **Compact size** makes it perfect for travelling.
- **Recharges iPod battery** during video transfer (cable not included).

*\*Full D1 quality capture without de-interlacing in "Best" mode for optimal TV viewing experience. Refer to capture quality chart for details.*

## Product Descriptions

### 25-Word Description

Recording videos has never been easier. With Pinnacle Video Transfer you can transfer videos, like TV shows and movies, to your iPod, PSP or USB 2.0 drive without using a PC.

### 50-Word Description

Want to watch TV shows and movies on your iPod or PSP? Make a digital copy of precious home movie tapes? Back up holiday videos when away from home? At the touch of a button, Pinnacle Video Transfer rapidly records video in MPEG-4 quality onto any USB 2.0 storage device without using a PC.

### 100-Word Description

Want to watch TV shows and movies on your iPod or PSP? Make a digital copy of precious home movie tapes? Back up holiday videos when away from home? At the touch of a button Pinnacle Video Transfer rapidly records video in MPEG-4 quality onto any USB 2.0 storage device without using a PC. It provides high-quality MPEG-4 encoding in H.264 at up to 720x480/576 (NTSC/PAL) resolution and supports multiple inputs including S-Video, Composite video and stereo audio. Video transfer is fast thanks to high-speed USB 2.0 technology, and the compact size makes it perfect for backing up holiday videos.
